[Portfolio](#)

PROFESSIONAL SUMMARY

Entry-level Data Analyst with a B.Com degree and hands-on experience in SQL, Python, Power BI, Tableau and Excel. Built two end-to-end Power BI dashboards on retail and quick-commerce sales data, covering data modelling, DAX measures, KPI tracking and interactive filtering. Skilled at turning raw sales data into clear insights on revenue, profit, product categories and regional performance. Seeking an entry-level Data Analyst role to support data-driven business decisions.

TECHNICAL SKILLS

Languages & Querying	SQL (MySQL), Python
Data Analysis	Pandas, NumPy, Microsoft Excel, Data Cleaning, Exploratory Data Analysis (EDA), KPI Reporting
Visualization & BI	Power BI, DAX, Tableau, Interactive Dashboards, Data Modelling
Databases	MySQL, MongoDB
Tools	Git / GitHub, Excel (Pivot Tables, Charts)

PROJECTS

Blinkit Sales Dashboard *Power BI, DAX*

[View on GitHub](#)

- Designed an interactive single-page Power BI dashboard on Blinkit grocery data tracking four KPIs: total sales, average sales, number of items and average customer rating.
- Analysed sales by item type, fat content, outlet size, outlet location tier and outlet establishment year using seven visuals, including donut, bar, line and funnel charts and a pivot table.
- Added dropdown slicers for location tier, outlet size and item type, plus a metric selector, so users can filter and compare outlet performance in one view.
- Applied a consistent brand-based colour theme with custom KPI cards to keep the report clear and easy to read.

Superstore Sales Dashboard *Power BI*

[View on GitHub](#)

- Converted Superstore sales data into business insights with KPI cards for sales, profit, quantity sold and average delivery time.
- Compared sales across category, sub-category, ship mode, customer segment, region and payment mode, and used a treemap to show sales and profit by state.
- Built year-over-year monthly sales and profit area charts to highlight seasonality and growth trends.
- Added a region slicer for quick drill-down and a calculated delivery-time metric to support shipping and regional analysis.

EDUCATION

Bachelor of Commerce (B.Com)

Graduated: May 2025

CDLU, Sirsa, Haryana

Relevant Coursework: Data Analysis, Data Visualization

CERTIFICATIONS

- MySQL and SQL Mastery – Udemy (Certificate of Completion)
