PROFESSIONAL SUMMARY

Detail-oriented **Data Analyst** with a Commerce background (B.Com) and hands-on expertise in **SQL, Python, Power BI, Tableau, and Advanced Excel**. Experienced in designing end-to-end business intelligence dashboards, performing data modeling (Star Schema), writing complex DAX measures, and transforming raw e-commerce/retail data into actionable strategic operational metrics. Skilled at conducting Exploratory Data Analysis (EDA) and tracking key business performance indicators to support data-driven decision-making.

TECHNICAL SKILLS

Querying & Databases:	SQL (MySQL), Complex JOINS, Subqueries, Aggregations, Window Functions, MongoDB
Data Analysis & Code:	Python (Pandas, NumPy), Exploratory Data Analysis (EDA), Data Cleaning, ETL Pipelines
BI & Visualization:	Power BI, DAX Measures, Data Modeling (Star Schema), Tableau, Interactive Dashboards
Spreadsheets & Tools:	Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, Dynamic Arrays), Git, GitHub

KEY PROJECTS

Blinkit Quick-Commerce Sales & Performance Dashboard

Power BI | DAX | Advanced Excel

- Architected an interactive single-page Power BI executive dashboard analyzing 8,500+ transactional records to evaluate key metrics including Total Sales, Average Order Value, Item Volume, and Rating.
- Engineered dynamic DAX measures and custom slicers enabling stakeholders to perform instant drill-downs across outlet tiers, outlet sizes, item types, and establishment periods in a unified view.
- Implemented 7 visual representations (donut, funnel, trend lines, pivot matrix) to track sales trends, item fat content distribution, and channel revenue across retail outlets.
- Applied brand-consistent design principles and custom visual hierarchy, improving report readability and user navigation for executive evaluation.

Superstore Retail Sales & Profitability Analysis

Power BI | Power Query | DAX

- Built an end-to-end retail analytical dashboard converting multi-region sales data into actionable executive insights on Revenue, Profit Margin, Quantity, and Logistics turnaround.
- Executed ETL operations using Power Query for data cleaning, data scrubbing, and table transformations; established a robust Star Schema model with dynamic date dimensions.
- Formulated Year-over-Year (YoY) monthly growth metrics and seasonality visual areas utilizing advanced DAX time-intelligence functions.
- Analyzed multi-dimensional logistics performance across Shipping Modes, Customer Segments, and State Treemaps to surface operational bottlenecks and top revenue-generating zones.

EDUCATION

Bachelor of Commerce (B.Com) — CDLU, Sirsa, Haryana

Graduated: May 2025

Relevant Coursework: Data Analysis, Business Statistics, Financial Accounting, Data Visualization

CERTIFICATIONS

- MySQL and SQL Mastery** – Udemy (Certificate of Completion)
- AI Tools & Applied Prompt Engineering** – be10X (Certificate of Completion)
